Contracts Manager

Subject: Lizton Rest Area Inspection

This memorandum is a follow-up to the quarterly inspection conducted at the Lizton Rest Area on February 7, 2008. The purpose of the inspection was to ensure that all cleaning and maintenance requirements are being met, as well as other important items relating to the satisfactory performance of the contract.

Overall, the Lizton Rest Area met or exceeded all cleaning specifications. The crew and supervisors should be commended on a job well done. I have personally seen substantial progress each and every inspection over the past year. The crew and supervisors literally treat the rest park like their home, and it is reflected in the detail and hard work they put into the cleaning of the park. I was especially pleased with the quality of care of the floors, as well as the work performed on the cement walls in the restrooms. ASI crew and supervisors literally cleaned the walls and were able to essentially make them look like new. They should be commended for going above and beyond their "normal" duties and doing everything in their power to make Lizton one of, if not THE, most well maintained and clean rest park in the state.

In the restrooms, there was no buildup present in any urinal or toilet. The sinks were clean and the mirrors were free of streaks and smudges. The chrome fixtures were free of buildup and the partitions and vents were free of dust. The floors were free of trash and debris, and there was no buildup of dirt or wax in the corners.

In the grounds area, there was no trash or debris observed in the parking lot, along the curb line or in the grounds itself. The picnic shelters were clean and free of trash, debris and bird droppings, and the trash cans were clean and emptied. The vending area was also free of spills and cobwebs.

We appreciate you and your staff's good work and your commitment to the State Use Program. If you have any questions regarding this report, please call me at the INARF office at 317-634-4957.
